Professional Summary

Full Stack Developer with 3+ years of experience building and shipping production-ready applications, with a strong focus on **Flutter-based mobile development**. Skilled in developing **end-to-end solutions**, integrating REST APIs, and managing local data using **Hive and SQFLite**. Experienced in **performance optimization, offline-first architecture, and clean code practices**, with a proven ability to take products from concept to deployment.

Technical Skills

Languages: Dart, Java, Python, SQL, C/C++
Frameworks & Libraries: Flutter, Flame, Provider, Hive, SQFLite
Mobile: Android, responsive UI, offline-first architecture
Backend & APIs: REST APIs, SQLAlchemy, Tornado, Gemini API
Tools: Git, Play Console, Figma-to-UI, DevTools

Projects

ProgressPal | Flutter, Hive, Provider, Gemini API Mar 2025 – Present

- Built and published an offline-first productivity and habit tracking app.
- Architected local persistence using Hive with zero cloud dependency.
- Integrated Gemini API for AI-assisted goal generation.
- Developed streak systems, weekly progress calendar, and adaptive theming.

Personal Diary | Flutter, SQFLite, Provider Sep 2024 – Present

- Developed a privacy-focused offline journaling app supporting text and image entries.
- Designed efficient SQFLite-based CRUD architecture for large journal datasets.
- Implemented JSON backup and restore workflows for full data portability.

One Bullet - Arcade Survival | Flutter, Flame, Hive Feb 2026 – Present

- Developed and published a minimalist arcade survival game with a physics-based infinite ricochet mechanic.
- Built real-time gameplay systems including collision detection, particle effects, and procedural obstacle spawning.
- Optimized rendering and object reuse to maintain stable **60 FPS** on mobile devices.
- Integrated Google Play Games Services for achievements and progression.

Professional Experience

Software Engineering Intern - Logixsy Technologies Jun 2025 – Aug 2025

- Designed and implemented Flutter UI features improving usability and consistency.
- Developed a full Flutter application by reverse-engineering REST APIs and translating Figma designs into production-ready UI.
- Built a secure 2FA authentication backend using Tornado and SQLAlchemy.

Indie Mobile App Developer Jun 2023 – Present

- Independently designed, built, and shipped multiple mobile apps and games.
- Managed full product lifecycle including architecture, testing, release, and maintenance.

Education

Bachelor of Science in Computer Science
National Skills University, Islamabad Sep 2022 – June 2026 (Expected)
